

Muneeb “Mickey” Akhter

(U.S. Citizen / Cleared)

4325 Pembroke Village Drive ♦ Alexandria, VA 22309 ♦ 469-559-4976 ♦ mickey@wardensys.com

PROFILE

Looking for a technical position in the Development, Implementation and Management of Cloud Solutions

WORK EXPERIENCE

OPEXUS dba AINS LLC, 1101 17th St NW STE 1200, Washington DC (VA SSBI Cleared)

.NET Developer

October 2023 – Present

- Interop Javascript, JAVA and .NET services for SSO and IAM roles passthrough to RBAC policies within different apps
- Led customer facing Sprint-based Agile iterative-design reviews and bug scrubs with VA SWIM/S
- Worked on integrating and maintaining FOIAXpress and eCase ASP.NET application (electronic case management) for IRS / DHS-OIG / VA / DOI-OIG and EPA

The Brite Group, 1110 Herndon Parkway STE 310, Herndon VA (Census SSBI Cleared)

Data Science Cloud Architect

April 2024 – June 2024

- Setup API Gateways / Management for data cleansing and training of A.I. models on Census CODS team.
- Generated intelligent LLM web scrapers that collected mass data for statistical modeling and predictions.

ECOM Atlantic, Inc. 13760 Noel Rd STE 500, Dallas TX 75240

Sr. Lead Cloud Architect

May 2023 – August 2023

- Managed all data and API integrations for Three Rivers warehouse / inventory management tool and CargoWise
- Designing DevOps policies / procedures – Azure DevOps / Terraform / Ansible and PowerShell Scripts
- Created alerting systems, live dashboards for system operations and log management
- Added automated test cases using Playwright, Cucumber, Jest/Jasmine and managed Test team

CACI International, 14370 Newbrook Drive, Chantilly VA 20151

Senior DevOps Engineer T3

August 2022 – February 2023

- Built C# batch jobs, ASP.NET web services, and transformers to migrate and integrate data between different ERP Business Objects for DFARS-certified government systems (Infor LN, Salesforce, ARENA PLM, iValua P2P).
- Setup Azure DevOps pipelines to deploy Dev/Test and Production servers with the first external OAuth API endpoint.
- Implemented security controls with Service Accounts running on AD groups and Access Controls.

Iron Mountain, 4117 Pinnacle Point Dr., Dallas TX 75211

Software Development Lead

November 2020 – June 2022

- Developed an AWS ECS with Docker and Machine Learning (AWS Textract) to create a scalable OCR solution to reconstruct damaged scanned documents with Kofak Capture
- Managed a development team abroad with Scrum Agile methodology and tools including JIRA and Monday.com
- Implemented a CI/CD pipeline with CodeDeploy and Elastic Beanstalk of increased web traffic or production load

Capital One Bank, 1680 Capital One Drive, McLean VA 22102

Senior Cloud DevOps Engineer

May 2018 – March 2020

- Directed complete AWS Cloud development of serverless web APIs for internal business operations to detect fraud with AWS S3 / RDS / Lambda / API Gateway / Route 53 / DynamoDB / CodeDeploy / Redshift
- Assisted development and code reviews of large C# .NET applications in Blazor with Angular front-ends
- Developed AI-based scanners to work with Financial Technical Data (Stock & Option bid-ask prices, volume, L2 data) to find opportunities with low risk spreads and general uptrend.

Warden Systems, 101-E Executive Dr., Sterling VA 20166

B2B Cloud Architect / SecDevOps Engineer

May 2012 – May 2015

- Lead team of 5 people using JIRA/Slack on-site on critical tasks and dealt with both C-level management and clients
- Architected and Migrated Security Management solutions for many Government and Small Business clients
- Agile Development of cloud-based IaaS/PaaS solutions in Team Foundation Server (TFS) to collect events in SQL databases
- Frontend (HTML5, CSS3, AngularJS/JQuery) and Backend (NodeJS, PHP, ASP.NET, Python, Java, Ruby) Full-stack Agile Scrum Developer using repositories in GIT, Subversion and TFS and package managers (NuGET, Sonatype Nexus, NPM)
- Extensive use of Unix Shell/Bash/Powershell scripts and running crontabs
- Improved Relational Database & Data Warehousing solutions with advanced MS SQL, MySQL, AWS RDS, Redshift

- Scripted Automated Deployments with CloudFormation/Terraform/Vagrant/Elastic Beanstalk, Setup and Configuration with Chef/Puppet/Ansible/Powershell/Orchestrator and Automated Tests with Jenkins/Python/Selenium Webdriver
- Built CI/CD (Continuous Integration / Continuous Deployment) Pipelines using Docker containers

EDUCATION

MS Computer Engineering

GPA: 3.37

George Mason University, Fairfax VA

December, 2012

DARPA SCATEboard – Side-Channel Attack Test Evaluation Board

- Developed VHDL code to simulate Crypto-Processors on embedded FPGA devices.
- Developed VHDL code for attacker FPGA device to mount chosen plain-text and cipher-text attacks.
- Developed C# software to perform Side-Channel Cryptanalysis to reverse engineer cryptographic keys.
- Developed CLI and GUI for SCATEboard to interface with FPGA devices.
- Advanced algorithms using Neural Networks to predict cryptographic algorithm used in device.
- Designed Combined Side-Channel Attack to successfully crack modified/salted cryptographic algorithms.
- Designed API for SCATEboard for open-source community development.

Scholarly Paper: Biometric Encryption Systems – The Future of Biometrics

Researched the development of Biometric Encryption Systems. Developed MATLAB and C# code to recognize human voice and use it to encrypt/decrypt a cryptographic key.

BS Electrical Engineering

GPA: 3.51

George Mason University, Fairfax VA

May, 2011

Senior Design: Omnidirectional Tele-presence Robot with Arm using C#

Principal software developer and integrator on a five-person team. Developed an algorithm for triangular omnidirectional motion and control of 5-axis servo-based robotic arm. Designed server/client software using TCP sockets in C# to send controls from server to microcontroller. Software worked with RTP and RTSP, with audio/video compression algorithms and maximize throughput during channel hand-off. Wrote a Human Interface Driver (HID) program to simulate joystick attached to robot. Software supports integration of Wi-fi to 900MHz HAM frequencies using directional Yagi antenna. Used Arduino mega microcontroller to interface with hardware H-bridges and battery. GUI Development for secure remote-control access to robot.

ORGANIZATIONAL EXPERIENCE

Founder and President of GMU ECHO (Electrical & Computer Hacking Organization)

March 2010 – February 2012

- Managed most Events and Funding for ECHO
- Competing in Hackathons, CTF competitions, Coding Competitions, Blue team defense competitions

SKILLS / QUALIFICATIONS

CERTIFICATIONS:

ScrumAlliance - CSPO

AWS – DevOps/Architect Pro

(ISC)² - CISSP

CompTIA - Security+, Project+, CASP

Microsoft – MCSD / MCSE

Exin - ITILv3

ECCouncil - CEH, CHFI

Cisco – CCNA, CCNP (expired)

GIAC - GCFE

Computer Languages: C, Objective C, **C#.NET (most proficient)**, C++, JAVA, ASM, Perl, Ruby, Python

Operating Systems: Windows (RT/Win32/CE), Linux, Unix, Android, VxWorks – Intel x86/64 & ARM

Software Applications:

MS Azure Suite (Web Apps Service, Service Fabric, Service Bus, Media Services, HDInsight, App Insight, Active Directory, Key Vault, SQL database, Redis Cache, Load Balancer, ExpressRoute, Xamarin, Website Migration Assistant), MS System Center (SCOM, SCORCH, SCCM), MS Office/Project/Visio, Snort, Nmap, Visual Studio Ultimate & TFS, MS Sharepoint, AWS (EC2, S3, EBS/EFS, EMR, CodeDeploy, X-Ray), Cadance Orcad Suite (Pspice / PCB editor), Playwright, Jest, Jasmine Automated Testing

Hackathon Projects:

Care o'line Service – 2nd Place winner in Health Hack DC Hackathon

- Full Development of Texting/Emailing Service that helps People keep in touch with Walks and Drives in their areas for causes they care about. Programmed in 6 hours.

MindScape WP7 App – Student winner in Nokia's Ready.Set() {Code} Challenge

- Full Development of Windows Phone App that helps parents find after-school activities for their kids. Programmed in 6 hours.

CapitaList WP7 App – 2nd Place winner in DCWEEK Hackathon

- Windows Phone App that lists Grants/Loans, Licenses & Permits for Aspiring Entrepreneurs. Also provides browsing of Government Contracts (FBO, Grants.gov, SBIR) and Proposals as well as support websites. Programmed in a weekend.
